📖 MessManager — Member Guide

Deep Axis Mess Management System · didaralif.github.io/Deep-Axis

1 🔐 Login

1. Open the link above in your browser (works on phone too!)
2. Select **your name** from the dropdown
3. Enter **your password** (ask Admin if you don't know it)
4. Click **Sign In**

> 💡 Your session stays active until you click **Logout** or close the browser.

2 🍽️ Update Your Meals

1. Click **Meals** in the sidebar
2. Find **your row** (your name + photo)
3. For **today's date column**, type your meal count
4. The value **auto-saves** when you click away

> ⚠️ **Rules:** You can only edit your own row. Past dates are locked. Green (verified) cells can't be changed.

3 🛒 Update Your Bazar Spending

1. Click **Bazar** in the sidebar
2. Scroll to the 🛒 **Bazar Cost (TK)** table
3. Find **your row** and **today's column**
4. Enter the amount you spent (in Taka)
5. For miscellaneous costs, use the 🧹 **Bazar Others** table below

4 🗓️ Bazar Duty Slots

At the top of the Bazar tab, you'll see a **color-coded calendar** showing who has bazar duty on each day of the month. Check which days are yours and plan accordingly! Only Admin can modify the schedule.

5 ✅ Verify Your Entries

Each cell has two verification badges:

Badge	Meaning

U (grey)	You haven't verified yet — **click to verify**
U (green)	You have verified ✓
A (grey)	Admin hasn't verified yet
A (green)	Admin has verified ✓

How: Click the **U** badge → it turns green. Once both U + A are green, the cell locks permanently.

> 📝 You can only verify entries for **today and yesterday**. You **cannot verify your own bazar** — another member must do it.

6 📊 Understanding the Dashboard

Field	What It Means
Meal Rate	Cost per meal = Total Bazar ÷ Total Meals
Your Cost	Your Meals × Meal Rate
Deposit	How much bazar you've done (money you put in)
Balance	Deposit − Cost (positive = others owe you)
Final	Your net balance after "Others" costs

☁️ Real-Time Sync

All data syncs instantly across all devices via Firebase. When you update a meal or bazar value, everyone else sees it in **real-time** — no refresh needed!

❓ Quick FAQ

Question	Answer
I forgot yesterday's meal!	Past dates are locked. Ask **ALIF (Admin)** to update it.
My cell is green and locked!	It's fully verified. Contact Admin if there's an error.
Where do I see how much I owe?	**Dashboard** → **Final** column in the statement table.
How do I switch themes?	Toggle **Dark Mode** at the bottom of the sidebar.
